

Enterprise Reporter for Office 365

Discovery and reporting across Office 365

Millions of people rely on Office 365 every day for their enterprise applications, and it's up to IT to facilitate their productivity. But because organizations are storing more and more sensitive data in Office 365, IT teams must also be concerned with security and compliance. In particular, they need to know who can access which resources across Azure Active Directory (AD), Exchange Online and OneDrive for Business, and be able to efficiently manage the subscriptions and licenses of Office 365 workloads to ensure users can use the applications they need without overspending.

Enterprise Reporter for Office 365 helps ensure the security of Azure AD, Exchange Online and OneDrive for Business environments by delivering visibility into users, groups, permissions, configurations, vulnerabilities, licensing and more. Detailed, customizable reports provide insight into workloads across Office 365, so organizations can protect sensitive data and more easily prepare for internal and external audits. Visibility into tenants, subscriptions and licensing service plans makes it easy to optimize Office 365 license allocation and service plan decisions. And automated report delivery reduces IT workload while ensuring stakeholders have the information they need, when they need it.

BENEFITS:

- Improves security and compliance by providing visibility into the configuration of critical IT assets in Azure AD, Exchange Online and OneDrive for Business
- Enables you to stay on top of who can access Azure AD users, groups, roles and applications; shared files and folders across OneDrive for Business; and Exchange mailboxes and public folders
- Makes it easy to optimize Office 365 license allocation and service plan decisions with visibility into your tenants, subscriptions and licensing service plans
- Facilitates a smooth domain migration or consolidation project by pinpointing Azure AD user and group dependencies, matching conflicts, and disabled accounts before the migration starts
- Scales to Office 365 environments of any size and location

SYSTEM REQUIREMENTS

For a complete list of system requirements, see the [Release Notes](#).

BUILT-IN REPORTS BY CATEGORY

Azure Active Directory:

Azure Tenant Information
Application Service Principals
Identities Membership and Roles
Azure Users, Roles, Groups and Members

OneDrive for Business:

Configuration Settings
Drive Information
Drive Permissions
File and Folder Information
File and Folder Permissions
Access Link Information

Exchange Online:

Distribution Group Members and Details
Mailbox Overview, Delegates and Details
Mailbox and Public Folder Permissions
Mail Contacts
Mail-Enabled Users

Subscription and licenses:

Service Plan Usage
Subscription Information
Licensed Users
Users without a License

Hybrid:

Exchange and Exchange Online Mailbox Permissions for Account
OneDrive and NTFS File and Folder Permissions

FEATURES

Security and compliance visibility

Gain visibility into the configuration of critical IT assets in Azure AD, Exchange Online and OneDrive for Business with flexible security reporting. Comprehensive Office 365 reporting provides the insight necessary to ensure Office 365 security, as well as compliance with internal policies and external regulations.

Insight into permissions

Stay on top of who can access which resources across your Office 365 environment, including Azure AD, Exchange Online and OneDrive for Business, with permissions reporting on:

- Azure AD users, groups, roles and application
- Shared files and folders across OneDrive for Business
- Mailboxes and public folders

Visibility into tenants, subscriptions and licensing

Easily optimize Office 365 license allocation and service plan decisions with visibility into your tenants, subscriptions and licensing service plans.

Pre-migration assessment

Ensure a smooth domain migration or consolidation project by pinpointing Azure AD user and group dependencies, matching objects, potential conflicts, and disabled accounts before the migration starts.

Scalable data collection

Scale to Office 365 environments of any size and location. Schedule collections during off-peak hours to minimize the impact on network and server performance, and leverage the distributed collection architecture for load balancing.

Azure Licensed Users with Service Plans
Shows licensed users with service plan information for the selected tenants.

Tenant: enterprisereporterdeveloper.onmicrosoft.com **Last Collected:** 13-Jul-2017 09:54 PM

User: 2016MB1 (2016MB1@enterprisereporterdeveloper.onmicrosoft.com)

License: Azure Active Directory Premium P1

Service Plan	Status
Azure Active Directory Premium P1	Enabled
Azure Multi-Factor Authentication	Enabled

License: Office 365 Enterprise E3

Service Plan	Status
Azure Rights Management	Enabled
Exchange Online (Plan 2)	Enabled
Flow for Office 365	Enabled
Microsoft Planner	Enabled
Microsoft StaffHub	Enabled
Microsoft Teams	Enabled
Office 365 ProPlus	Enabled
Office Online	Enabled

Figure 2: With Enterprise Reporter for Office 365, you can optimize license allocation and service plan decisions with visibility into tenants, subscriptions and licensing service plans.

Enterprise Reporter for Office 365 helps ensure the security of Azure AD, Exchange Online and OneDrive for Business environments.

Customizable reports

Perform efficient, effective data analysis and satisfy the unique informational needs of your organization using predefined reports or by creating new reports with additional attributes. Customize any report with advanced filtering, and choose from multiple formats, including PDF, HTML, MHT, RTF, XLS, XLSX, CSV, text and images.

Automated reporting workflows

Ensure stakeholders get the reports they need, when they need them, with automated report generation and flexible delivery schedules.

Separation of duties (SoD)

Honor departmental and business function boundaries by enabling auditors, help desk staff, IT managers and other stakeholders to get exactly the reports they need and nothing more.

Common reporting portal

Export reports to our [software knowledge portal](#) for a unified reporting interface across the entire family of Quest [security and compliance solutions](#).

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple to use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
